

A modern office interior with large windows, desks, and people working. The office is bright and airy, with natural light streaming in from the large windows. There are several desks with computers and people working. The architecture is clean and minimalist, with white walls and light-colored wood flooring.

Comprehensive BIM Services from The Loops

The Loops offers a comprehensive suite of BIM (Building Information Modeling) services to support your project needs. Our expertise spans the entire BIM lifecycle, ensuring seamless implementation and successful outcomes.

BIM Training

We provide tailored BIM training programs to equip your team with the skills and knowledge necessary to leverage BIM effectively. Our experienced instructors will guide you through the latest BIM tools and methodologies, empowering your organization to unlock the full potential of BIM.

BIM Modeling Services

Our skilled BIM modelers deliver high-quality, detailed 3D models that serve as the foundation for your project. From conceptual design to as-built documentation, we ensure your BIM models are accurate, comprehensive, and aligned with your requirements.

Documentation and Coordination

Leverage our expertise in BIM-driven documentation and coordination to streamline your project workflows. We generate detailed shop drawings, as-built drawings, and comprehensive project documentation, while implementing robust clash detection and resolution processes.

Implementation Support

Our team of BIM specialists provides hands-on implementation support, guiding you through the adoption and integration of BIM within your organization. We ensure a seamless transition, offering training, process optimization, and ongoing technical assistance.

BIM360 and Cloud-Based Services

Harness the power of cloud-based BIM platforms like BIM360 to enhance collaboration, data management, and remote access. The Loops offers comprehensive BIM360 implementation and support, empowering your team to work more efficiently and effectively.

BIM Training

1

Comprehensive Programs

Our BIM training covers practical and theoretical knowledge.

2

Industry Standards

Training is tailored to meet industry BIM standards.

Comprehensive BIM Modelling Services

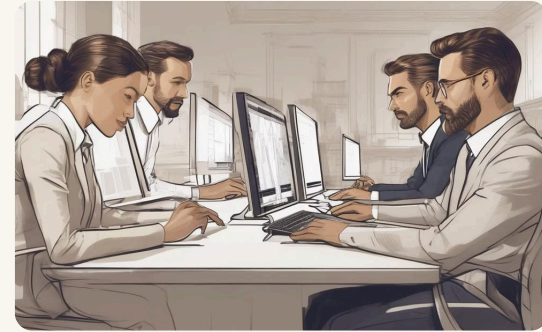

Cross-Discipline Modelling

Our team of BIM experts specializes in creating accurate, coordinated models across architectural, structural, and MEP disciplines. We follow industry standards and best practices to ensure seamless integration of model elements.

Advanced LOD Capabilities

We deliver BIM models at high levels of detail (LOD 300-500) to meet the most stringent project requirements. Our modelling processes leverage the latest BIM software and technologies to maximize productivity and minimize errors.

Proven Quality Assurance

Architectural Gains is known for our meticulous attention to detail and quality control measures. We employ robust QA/QC protocols to validate the accuracy, clash-free status, and overall integrity of our BIM models before delivery.

Comprehensive Documentation & Coordination

Detailed Documentation

We provide comprehensive BIM documentation including BEPs, MIDPs, TIDPs, and asset registers to ensure full project coordination and handover.

Rigorous Clash Coordination

Our team thoroughly analyzes BIM models to identify and resolve design conflicts across disciplines, minimizing costly rework on site.

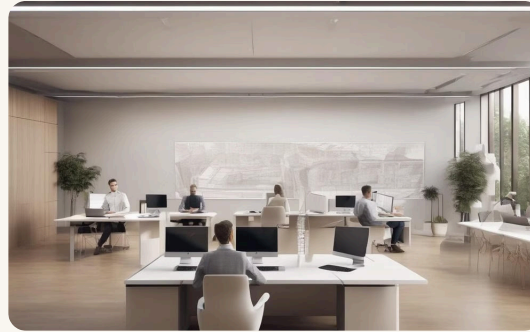

Accurate Shop & As-Built Drawings

We produce highly detailed construction drawings and as-built documentation to support efficient fabrication, installation, and facility management.

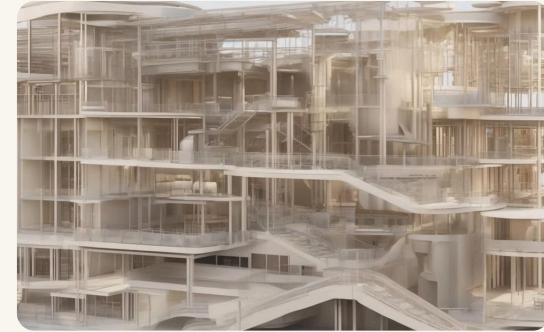

Implementation Support

Architectural Gains provides end-to-end BIM implementation solutions, ensuring a smooth transition to BIM-enabled project delivery.

Manpower Supply

Our pool of certified BIM coordinators, modelers, and specialists are available to supplement your in-house team across disciplines.

Architectural, Structural, MEP

We follow industry standards to create accurate, coordinated BIM models for all building systems.

BIM360 & Cloud-Based Services

Comprehensive Cloud Platform

Leverage the power of Autodesk's BIM360 cloud platform for centralized data management, real-time collaboration, and unified project delivery.

Streamlined Digital Workflows

Our cloud-based solutions enable efficient, transparent processes that connect your entire project team for seamless collaboration.

ISO 19650 Compliance

Ensure your BIM data is organized and structured per industry-standard ISO 19650 guidelines for information management.

Our Unwavering Commitment to Excellence

Strict Adherence to ISO 19650

We rigorously follow the ISO 19650 standards for information management, ensuring the highest levels of quality and consistency in our BIM deliverables.

Guaranteed On-Time Delivery

With our meticulously planned workflows and experienced project management, we consistently meet or exceed our clients' project timelines, delivering BIM models and documentation exactly when needed.

Industry-Leading BIM Expertise

As pioneers in the field of BIM, we pride ourselves on being the market leaders in providing comprehensive BIM services that set the benchmark for the industry.

Our Office

605, Bin Shahib Mall, Block 3,
Al Qusais, Dubai, UAE.
